SUMMARY

Fresh Statistics graduate who turns messy business data into clear reports and dashboards. Built automated sales and inventory reporting during an internship that cut reporting time from two days to under an hour. Looking for a Data Analyst role in Lahore.

EDUCATION

BS Statistics, Example University, Lahore

Graduated June 2026, CGPA 3.4 / 4.0

Relevant courses: Probability, Regression Analysis, Sampling Techniques, Database Systems

SKILLS

Data and analysis: SQL (PostgreSQL, MySQL), Excel (pivot tables, Power Query, VLOOKUP/XLOOKUP), Statistics, A/B testing

Programming: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter

Visualisation: Power BI (DAX, data modelling)

Tools: Git, Google Sheets

Soft skills: Communication, Presenting findings to non-technical teams, Teamwork

EXPERIENCE

Data Analyst Intern, Example Retail (Pvt) Ltd, Lahore, Jul 2025 - Sep 2025

Wrote SQL queries to pull daily sales from 14 stores and built a Power BI dashboard for the regional manager.

Automated the weekly sales report with Python and Pandas, reducing preparation time from two days to under one hour.

Found that 9% of stock-out days came from late re-orders on 20 products and presented a re-order threshold fix.

Teaching Assistant, Statistics Department, Example University, Feb 2025 - Jun 2025

Ran weekly lab sessions on Excel and regression for 40 second-year students and marked assignments.

PROJECTS

Customer Churn Analysis

Analysed 7,000 anonymised telecom customer records in Python to find which plans and tenure groups churn most.

Built a logistic regression model (78% accuracy) and summarised three retention actions in a one-page report.

Lahore Air Quality Dashboard

Cleaned two years of public hourly air-quality data with Pandas and built a Power BI dashboard showing

seasonal smog peaks by area. Used SQL views to keep the dashboard refreshing from one source table.

Ramadan Sales A/B Test

For a university case study, compared two discount banners with an A/B test and a two-proportion z-test,

showing the second banner lifted conversion by 1.8 percentage points ($p = 0.03$).

CERTIFICATIONS

Google Data Analytics Professional Certificate (Coursera), 2025

Kaggle Learn: Intro to SQL, Advanced SQL, Pandas
